wilson plant co.

thank you for choosing wilson plant co to bring your landscape vision to life. what follows is a collaborative guide through the process designed to ensure your landscape thrives from day one. we're here to make it seamless.

perfect placement

each plant comes with a white flag. ensure the name of the plant is on the back of each flag and place it exactly where you'd like it planted - right in the center of its future home. we ask that you do this within 48 hours so we can move forward thoughtfully.

please make sure each location is free from existing plants, stumps, or large root systems. if you're wondering where your plant might flourish the most, give us a call. we're here to help.

site preparation

what we'll do: we coordinate with kentucky 811 to have major utility lines marked - a process that typically takes 5-7 business days. you may see painted lines and colored flags representing electric, gas, telephone, sewer, and water.

what we ask of you: some lines like propane, landscape lighting, invisible fencing, irrigation systems, drain tiles, geothermal, and service connections beyond the main are outside the scope of 811. it is the property owner's responsibility to coordinate the marking of all private lines & services before we arrive. we work carefully and with great attention, but your diligence ensures a smooth & safe installation.

timing and scheduling

our goal is to complete your planting within 2-5 weeks of your purchase. spring is our busiest season, and we appreciate your patience as timelines tend to lean toward the longer end of that window. weather and soil conditions may affect timing, as we prioritize what's best for your plants' health.

we honor each project with equal commitment, moving through them in the order they arrive. if the proposed date range is declined, your project will return to the queue and we will provide a new date range when available. you don't have to be home. our experienced team will work independently and respectfully on your property.

our commitment

for nearly five decades, we've been planting with purpose. every tree, every shrub, every perennial receives the same attention and professionalism we'd give our own gardens.

by signing below, you're confirming that the installation order is complete and accurate and you authorize the work to proceed as written. you accept responsibility for notifying us of and marking any obstructions not identified by kentucky 811 & understand that wilson nurseries, inc. assumes no responsibility for any damages or repair costs associated with unmarked or incorrectly marked lines. when utilities fall within 2-3 feet of a plant's outer planting radius, a location change or an additional $50 per plant fee may be required to safely work around them. you understand that changes to this scope of work require approval and that additional labor will be billed at $75 per man hour. you agree to pay remaining charges upon completion.
